Acclaimed German Manufacturer Fun Factory Announces Release of DER VIBRATOR Line

The next generation of rechargeable toys features FlexiFUN Technology™.

LOS ANGELES, July 28, 2015 – Fun Factory has released upgraded editions of the popular Patchy Paul and Tiger vibrators, the first in their highly anticipated G5 – Der Vibrator line. Made of the same supple medical grade silicone that has made Fun Factory a beloved brand for nearly two decades, the line uses FlexiFUN Technology™ for a pliable shaft that moves with the user’s motion. Customers will love the Der Vibrator line’s quiet, deep frequency vibrations, which feel like a powerful rumble, rather than a high-pitched buzz, and can be felt just as intensely at the toy’s tip as at its base.

FlexiFUN Technology™ opens up a variety of options, in terms of both comfort and play. Adventurous customers will be excited to discover how many positions and sensations a flexible shaft allows. Users with sensitive skin or vaginal atrophy will experience greater physical comfort than with other insertable toys, as a Der Vibrator toy will mold to the natural curves and movements of the body.

Designed for intuitive control, Der Vibrator toys feature an ergonomic loop handle that is equally effective for right- and left-handed users. With Der Vibrator’s easy one-button on/off control, customers can simply “press FUN to play” and then use the + and - buttons to scroll through six vibration intensities and six rhythms. Customers who travel will also appreciate the key lock function, which lets them ensure that their toy won’t start buzzing at an inopportune moment.

The Der Vibrator line is 100% waterproof, thanks to Fun Factory’s signature Click’n’Charge system. The new battery level display lets customers know when their Patchy Paul or Tiger vibrator needs a charge, so that they never run out of fun.

“We wanted our customers to be able to get the most fun possible out of this next generation of vibrators,” commented Kristen Tribby, Fun Factory’s Director of Marketing and Education. “Whether that means using the vibes’ impressive length to experience a cervical orgasm for the first time or inventing a position that no one has ever tried before, these toys let your imagination run wild.”
